

SMARTER WAYS TO WORK™

Ground Prep

Ground Preparation Attachments

Clear. Level. Loosen. Rake. FINN can do it all!

FINN Ground Preparation attachments are the ideal tools for clearing terrain, de-compacting, and leveling ground in preparation for seeding or sod with far fewer labor hours than Harley rakes or hand work. They are tough, reliable, and ideally suited to preparing seedbeds.

Works with Equipment You Already Own

Designed for compact tractors, skid steers, and mini skid steers, these tools operate in both forward and reverse with up to four simple components working together to make it easy to clear land and leave a smooth finished seedbed. Depending on the model you choose, the scarifiers, finish rake, leveling rake and gauge tires all work together to do the job efficiently. These tools not only save you time, but they do a far better job with soil prep than other tools. With all of the functionality built into these revolutionary attachments, the tedious and back breaking task of hand work can be eliminated.

The Toughest Tools on the Jobsite

Forged steel, cast iron, AR steel, welded construction—everything from the frame, to the foam filled tires is engineered to take a pounding and continue to perform. With no complicated and expensive hydraulically powered rotating parts, FINN Ground Preparation attachments are toughest tools on the jobsite.

Results Your Customers Love

Perfectly graded ground with soil de-compacted up to 6" deep means your seed has the best environment for germination and developing a healthy, deep root system. And you did it in less than half the time of your competitors. Save Time, Space and Money – When one tool can clear brush, de-compact the soil, and leave a smooth and level seedbed, you save space on the trailer, save time by not switching implements, and save money by owning and maintaining just the one tool that can do it all.
